

Q-Flex EZ Scan

Now you can provide proof of your production lines' output with the Q-Flex EZ Scan. It is as simple as printing a report from a memory stick.

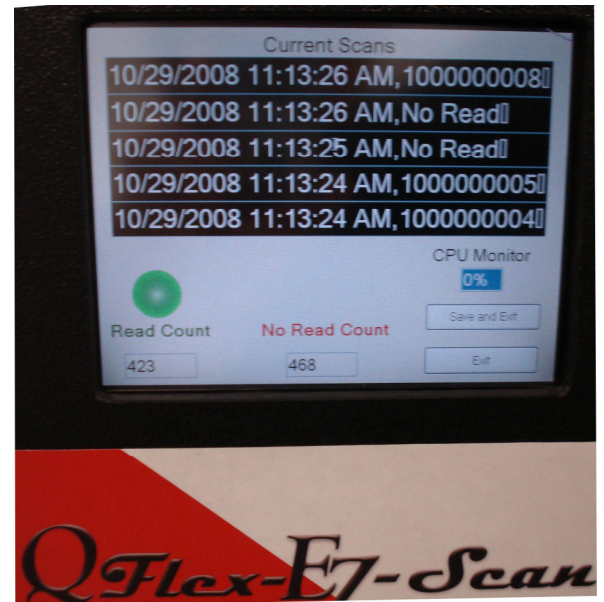

The Quest Service Labs in-line go-no-go barcode scanning verification system with light stack provides visual indication as well as a touch screen visual. The Q-Flex EZ Scan can mount up to three Data-logic scanners at the same time for real time data collection.

Run your production line with confidence and documented proof of scanned verified barcodes.

Light Stack for visible reads

**Adjustable Scanner
Bracket For Any
Position**

- ◆ Easy to Read Screen
